CAREER OBJECTIVE

B.Tech CSE student at Chandigarh University (2027) with a strong foundation in frontend development and a keen eye for user-centred design. Experienced in designing and building responsive, intuitive interfaces for real-world applications — including a full-stack chat app, a weather dashboard, a quiz platform, and a hospital workflow system. Comfortable working at the intersection of interaction design and implementation, translating user needs into clean, usable, and visually consistent product experiences.

DESIGN & TECHNICAL SKILLS

UI/UX & Design: Wireframing, Mockup Design, Interaction Design, Visual Design, Usability Evaluation

Design Tools: Adobe Photoshop, Canva, Responsive Layout Design

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap,

Principles: User-Centred Design, Information Architecture, Design Consistency, Cross-Platform UI

Collaboration: Git, GitHub, Unix/Linux

EDUCATION

Bachelor of Engineering – Computer Science & Engineering	2023 – 2027
Chandigarh University, Mohali, Punjab	7.17

Class XII – Science (CBSE)	2022 – 2023
MRA DAV Public School	71%

Class X	2020 – 2021
MRA DAV Public School	78.8%

PROJECTS

Real-Time Chatting Application	React.js / Node.js / MongoDB / Socket.io
---------------------------------------	--

- Designed the complete UI/UX for a real-time chat application — created wireframes and mockups for message threads, user lists, and notification flows before implementation.
- Built reusable React components following interaction design best practices, ensuring consistent visual language and intuitive user flows across the entire interface.
- Focused on responsive layout design and micro-interaction feedback (typing indicators, message delivery status) to enhance overall usability and user experience.

Weather Dashboard Application	JavaScript / HTML5 / CSS3 / Bootstrap / REST API
--------------------------------------	--

- Designed a clean, visually consistent weather dashboard UI with a focus on data hierarchy, readability, and intuitive navigation across desktop and mobile viewports.
- Applied visual design principles — colour contrast, typography, spacing, and iconography — to present real-time meteorological data in an accessible and user-friendly manner.
- Implemented error state and empty state UI designs to handle API failures gracefully, ensuring a polished end-to-end user experience.

Hospital Management System	JavaScript / HTML5 / CSS3 / MySQL
-----------------------------------	-----------------------------------

- Designed multi-module UI for patient records, doctor profiles, and appointment scheduling — prioritised information architecture and workflow clarity for non-technical end users.
- Collaborated with backend logic to ensure UI components reflected real-time data updates, maintaining design consistency across all modules and user roles.

CERTIFICATIONS

- HTML, CSS, and JavaScript for Web Developers** – Coursera (Johns Hopkins University)
- Full Stack Software Developer Professional Certificate** – Coursera (IBM)
- Full Stack Web Development Certification** – freeCodeCamp

ACHIEVEMENTS & EXTRACURRICULAR

- State-Level Kickboxing Champion** – Demonstrates discipline, high ownership, and consistent performance under pressure.
- State-Level Badminton Representative** – Highlights teamwork, collaboration, and strategic execution in competitive environments.
- IMO Level 2 Qualifier** – International Mathematics Olympiad; reflects strong analytical thinking and logical problem-solving aptitude.
